

# KNOW YOUR MEMBERS' MEDICATION ADHERENCE. THEN IMPROVE IT.

The RxAnte Stars solution is a turnkey approach to improving health plans' Part D performance. Understand opportunities for improvement using our advanced predictive analytics, and take action with our portfolio of interventions.

## DATA-DRIVEN PROGRAM DESIGN

Comprehensive program simulations and performance forecasting to better inform your approach and expected outcomes.

## TIMELY AND ACCURATE TARGET LIST DELIVERY

Know the right members to intervene upon each week and avoid missing fill days prior to intervention deployment.

## WORKFLOW MANAGEMENT

RxEffect® streamlines adherence outreach across multiple intervention teams and shares the right clinical context to be effective.

## EFFECTIVE MEMBER ENGAGEMENT

A portfolio of managed interventions that can be rapidly deployed with proven effectiveness.

## PROGRAM OPTIMIZATION

Consultative services to help maximize your performance throughout the year.

### The RxAnte Stars solution provides the complete solution:

Population-level performance forecasting to inform resource deployment; accurate at-risk member identification; and a portfolio of interventions that allow you to reach your plan membership with the most effective blend of outreach methods to achieve your Part D performance goals.

RxAnte pioneered analytics-driven pharmacy quality improvement and has continuously innovated its solutions and services since it was founded in 2011. Our range of interventions are distinct from the rest; this includes Mosaic Pharmacy Service, our most powerful intervention designed to reach your most complex and vulnerable members with ongoing, comprehensive pharmacy support.

# LOOKING FOR A PHARMACY PARTNER TO ENGAGE YOUR MOST VULNERABLE MAPD MEMBERS?

Mosaic is a comprehensive pharmacy service that helps medically complex MAPD members take the right medications each day. We provide your most vulnerable Medicare population with ongoing pharmacy care to reduce unnecessary pharmacy utilization, remove barriers to adherence, and positively impact the cost of care.

- In-depth clinical review of regimen
- Facilitate regimen optimization with prescribers and health plan
- Address medication adherence barriers through regular, live touchpoints
- Provide ongoing comprehensive care and easy-to-use adherence packaging

Here are a few examples of how we've delivered transformative pharmacy care:

### THE SITUATION:

A Medicare member was hospitalized for a GI bleed and complications due to high blood pressure and diabetes

### THE RESULTS:

After a Mosaic home visit specialist reviewed the existing medication regimen, we discovered duplicate prescriptions and an alternative therapy to save money and improve member wellbeing. In all, our interventions included:

Deprescribed an unnecessary therapy

Discontinued \$500 diabetes medication and switched to an alternative option

Regained control of glucose by restarting an oral antidiabetic therapy

As a result of recommended Mosaic changes, the health plan saw savings of

**\$10,000+ A YEAR**

### THE SITUATION:

A Medicare member was hospitalized from complications due to pneumonia and sepsis

### THE RESULTS:

After a clinical home review, Mosaic found the member was only given a 3-day supply of antibiotics. In collaboration with the member's physician, we assisted with the following:

Obtained the necessary prescription for a longer supply of antibiotics

Reduced the dangerous risk that existed for a potential gap in therapy

Lowered the chance of rehospitalization for this member

With Mosaic's help, a possible hospital readmission was prevented, a

**\$14,000 COST AVOIDANCE**
