

A PATIENT EDUCATION TOOL LIKE NO OTHER

About

VUCA Health has created the largest library of medication education videos that can integrate into websites, mobile apps, smart speakers, and pharmacy management systems.

What We Do

We work directly with health systems, pharmacies, health plans, and developers to equip them with a new way to deliver patient education and improve outcomes. Our content helps to:

- Increase health literacy
- Increase adherence and engagement
- Improve HCAHPS scores and patient satisfaction

Our video library is designed for patients, by pharmacists.

Our videos cover the most common and important information patients need to know to best manage their health and medications. Videos include indications, potential side effects, proper administration, and expected benefits.

- ✓ Available in English and Spanish
- ✓ Short and concise
- ✓ Easy to understand
- ✓ Administration technique training
- ✓ Health condition education
